

## LINDOKUHLE NTULI

Age: 2

Gender: Female

Grade: Care Group

Number of people in household 8 children

5 Adults (Grandparents, Aunts and Uncles)

### Backgrounds

Lindokuhle's mother is still very young she dropped out from school and after her child was born she found a job as a domestic worker. Her grandmother is raising her and also two of her sister's (who passed away) children. Both these children are disabled - they can't talk and the grandmother is having a drinking problem and she is always fighting with her husband.

Lindokuhle is malnourished and grandmother is not caring for her properly. She has problems with her ears – constant puss running out. She had an operation few weeks ago but it didn't stop

Lindokuhle started at the Centre January.

### Assistance Provided

Assist with family with Identity books and birth certificates for all the children

Assist them to apply for social grants

Took the children to clinic

Referred the grandmother to the social workers

Provide her meal four times a day

Food Parcels and clothes

### Results

Took her to the clinic – arranged for ears to be looked at

She is now eating healthy at the centre and malnourishment should clear up in 6 month or so.

Home situation is improving due to intervention of the social worker.
